Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-22 and 54-59 rejected under 35 U.S.C. 102(b,b,b,b,e) as being clearly anticipated by Miller, Muszak et al., Komiyama et al., Clark ('691) or Clark et al. (USP 6,190,617) respectively.

All of the references teach automated analyzers with incubator housings, multiple load stations, multiple drive means that rotate concentric carousels carrying samples/reagent the and read stations.

Election/Restrictions

Applicant's election with traverse of 11/5/03 is acknowledged. The traversal is on the ground(s) that there would be no additional burden of search. This is not found persuasive

Art Unit: 1743

because the 10/10/03 restriction requirement has shown the inventions are independent and distinct and would require additional searching.

The requirement is still deemed proper and is therefore made FINAL.
